VoIP/911 Deployment Status

Intrado Major Market Rollout Schedule

Data as of September 5, 2006

Deployment Challenges Areas Prevented from Deploying

Auto Location

- Washington State and NYC Field Trials
- Public Safety Precision Requirements
 - VoIP is a different use case than Wireless
 - Wireless use cases have changed
 - Convergence demands careful consideration of VoIP 9-1-1 location precision
- Public Policy
 - Data valuable to First Responders
 - Data usable for providing emergency response
 - MSAG validation, 3-axis mobile, exact address
- Privacy and Security
